

GATEWAY

Gateway is funded by the Tertiary Education Commission and is designed to strengthen the pathway for students to progress from school to workplace learning, also providing workplace learning across a range of industries and businesses, while they continue to study at school.

Carlos Knight (Yr 12) and Bayleigh McGuire (Yr 11) are currently working towards their Level 3 Certificate in Aviation through ATTTO. The two students will be placed around various aviation establishments and have visited Kaikoura Aero Club where they were given valuable insight into obtaining a commercial pilots licence. Soon they will be visiting Amuri Helicopters Helicopters, Canterbury Aero Club, Wings over Whales and Air New Zealand International Airport. Gateway is also in the process of purchasing a flight simulator to aid in the student's studies.

Gabriella Kahu (Yr 12) is studying unit standards in drama. Gabriella has attended St Andrews College Beyond the Camera ten day workshop and will also attend Aoraki Polytech in the next school holidays to participate in a three day course on TV Presenting.

Dylan Pugh is in second year of carpentry and works weekly with Chris Hill on various building sites around the Cheviot community. His unit standards are gained through BCITO. Gateway students rely on the support of local businesses for work placements and we value the continued support from Chris Hill Builders.

Aaron Cleaver (Yr 12) will be studying Land-Based Industry unit standards at the National Trade Academy on McLeans Island.

STAR

The Secondary Tertiary Alignment Resource provides all state secondary schools with additional funding to access courses that provide greater opportunities for students.

Brodie Morton (Yr 13) and Aaron Cleaver (Year 12) passed their Introduction to Shearing course through Tectra. Both boys were required to attend a four day course in Waikari.

Carlos Knight (Yr 12) completed the defensive driving course provided through Avon City Ford, enabling him to reduce the period of his restricted licence.

All year 11-13 students had their camp to the Boyle River Outdoor Education Centre subsidised by STAR. Students will achieve unit standards with this camp.
